Election/Restrictions

Applicant's election without traverse of claims 1-23, 41-75, 94-103 in Paper No. 9 is acknowledged.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Caroline Fleming on 8/7/03.

The application has been amended as follows:

Claims 31-40 are cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23, 41-75, 94-103 are rejected under 35 U.S.C. 102(e) as being anticipated by Mizuno et al. (5,876,325).

With respect to claims 1, 14, 41, 54, 63 Mizuno et al disclose a method of controlling a surgical instrument that is inserted in a patient for facilitating a surgical procedure and controlled remotely from an input device manipulated by a surgeon at a user interface, the method comprising the steps initializing the position of the surgical instrument without calculating its original position, and the position of the input device under electronic control; as set forth in column 9, lines 1-67, the initializing including establishing an initial reference position for the input device and an initial reference position for the surgical instrument; as set forth in column 10, lines 1-67, calculating the current absolute position of the input device as it is manipulated by the surgeon; as set forth in column 10, lines 11-67; determining the desired position of the surgical instrument based upon; the current position of the input device, the reference position of the input device, and the reference position of the surgical instrument, and moving the surgical instrument to the desired position so that the position of the surgical instrument corresponds to that of the input device; as set forth in columns 11-49, lines 1-67.

With respect to claims 2-13, 15-23, 42-53, 55-62, 64-75, 94-103, the method steps, as set forth, would have been inherently carried out in the operation of the device.
